UI/UX designer

SUMMARY

I am a student recently graduated from Trinity College Dublin. I am passionate to be a UI/UX designer, I have a solid experience in full projects design and efficiently collaborate with other designers, developers and testers as a team. I equipped with a fast learning ability to quickly master new tools and tackle challenges with confidence.

EDUCATION

North China University of Water Resources and Electric Power	Sep 2018 - Jul 2022
Electronic information engineering Bachelor	Zhengzhou
Trinity College Dublin	Sep 2023 - Sep 2024
Interactive digital media Master	Dublin

PROJECT EXPERIENCE

NOMNOM Sep 2024 - Aug 2024

Web designer and Visual designer

- The NOMNOM is a mobile app that recommends nearby restaurants based on cuisine type, ambiance and price, especially highlighting the top-rated cuisine so that can save time for making choice and improve the possibility of good dining experience.
- Outline the questions with team and create a survey in Microsoft Forms to gather user requirements. Write the report after analyzing the survey result.
- Designed an interface in Figma including the design of buttons, icons, spacing, typography, color schemes and layout.
- Built the front end using React Native and Javascript, and collaborated with Node.js, Express, Axios, and MongoDB for back end functionality to bring a smooth and responsive interface

PLANDI Sep 2024 - Oct 2024

UI/UX designer and Web developer

- The PLANDI is a to-do app with social features which enables user to plan daily activities, book popular events, share photos and follow their friends.
- Conduct client meeting to gather information and draft reports to clarify user requirements.
- Create color scheme in Figma to enhance visual contrast across task categories, track statuses and several responsive buttons.
- The core components including task, event, post and profile sections use React.js for front-end layout and Axios to interact with backend service.
- The MongoDB as the backend database received the request from frontend and manage user data to support real-time updates.

SKILLS & OTHERS

- **Design Skills:** User research, Interaction design, Visual Design, Wireframing
- **Technical Skills:** HTML/CSS basics, Javascript, React.js, Data Analysis, Accessibility
- **Design Tools:** Figma, Adobe Ps, Adobe Ai
